

Add Memory to OpenAI Functions Agent

This notebook goes over how to add memory to OpenAI Functions agent.

```

from langchain import (
    LLMChain,
    OpenAI,
    SerpAPIWrapper,
    SQLDatabase,
    SQLDatabaseChain,
)
from langchain.agents import initialize_agent, Tool
from langchain.agents import AgentType
from langchain.chat_models import ChatOpenAI

```

API Reference:

- `initialize_agent` from `langchain.agents`
- `Tool` from `langchain.agents`
- `AgentType` from `langchain.agents`
- `ChatOpenAI` from `langchain.chat_models`

```

/Users/harrisonchase/.pyenv/versions/3.9.1/envs/langchain/lib/python3.9/site-
packages/deeplake/util/check_latest_version.py:32: UserWarning: A newer
version of deeplake (3.6.4) is available. It's recommended that you update
the latest version using `pip install -U deeplake`.
  warnings.warn(

```

```

llm = ChatOpenAI(temperature=0, model="gpt-3.5-turbo-0613")
search = SerpAPIWrapper()
llm_math_chain = LLMChain.from_llm(llm=llm, verbose=True)
db =
SQLDatabase.from_uri("sqlite:///../../../../notebooks/Chinook.db")
db_chain = SQLDatabaseChain.from_llm(llm, db, verbose=True)
tools = [
    Tool(
        name="Search",

```

```

        func=search.run,
        description="useful for when you need to answer questions about
current events. You should ask targeted questions",
    ),
    Tool(
        name="Calculator",
        func=llm_math_chain.run,
        description="useful for when you need to answer questions about
math",
    ),
    Tool(
        name="FooBar-DB",
        func=db_chain.run,
        description="useful for when you need to answer questions about
FooBar. Input should be in the form of a question containing full
context",
    ),
]

```

```

from langchain.prompts import MessagesPlaceholder
from langchain.memory import ConversationBufferMemory

agent_kwargs = {
    "extra_prompt_messages":
[MessagesPlaceholder(variable_name="memory")],
}
memory = ConversationBufferMemory(memory_key="memory",
return_messages=True)

```

API Reference:

- `MessagesPlaceholder` from `langchain.prompts`
- `ConversationBufferMemory` from `langchain.memory`

```

agent = initialize_agent(
    tools,
    llm,
    agent=AgentType.OPENAI_FUNCTIONS,
    verbose=True,
    agent_kwargs=agent_kwargs,
    memory=memory,
)

```

```
agent.run("hi")
```

```
> Entering new chain...  
Hello! How can I assist you today?
```

```
> Finished chain.
```

```
'Hello! How can I assist you today?'
```

```
agent.run("my name is bob")
```

```
> Entering new chain...  
Nice to meet you, Bob! How can I help you today?
```

```
> Finished chain.
```

```
'Nice to meet you, Bob! How can I help you today?'
```

```
agent.run("whats my name")
```

```
> Entering new chain...  
Your name is Bob.
```

```
> Finished chain.
```

'Your name is Bob.'
