

Tile

The `--tile` parameter generates images that can be used as repeating tiles to create seamless patterns for fabrics, wallpapers and textures.

`--tile` works with [Model Versions](#) 1, 2, 3, test, testp, 5, 5.1, and 5.2 .

`--tile` only generates a single tile. Use a pattern making tool like this [Seamless Pattern Checker](#) to see the tile repeat.

Tile Examples

prompt scribble of moss on rocks `--tile`

prompt watercolor koi --tile

How to Use the Tile Parameter

Add `--tile` to the end of your prompt.
